Tub & Tile Cleaner

1/4 cup grease cutting dish detergent 1 cup baking soda

In a small bowl, combine dish detergent and baking soda. Mix well with a fork. Cleanser will be a thick paste. Store in an airtight plastic container.

Use a non-abrasive pad. Dab a small amount of cleanser onto pad. Rub onto dirty surface. For tough spots, allow cleanser to sit 20 to 30 minutes. Rub again. Rinse cleanser off. Repeat, if necessary.

Note: Measure and pour detergent first. Use same measuring cup to measure baking soda. This helps to remove remaining detergent in measuring cup.
